Julian Oviedo

Software Developer [Front-End]

About me

My name is Julian, I'm 26 years old. **I'm currently studying Computer Science since almost 3 years and also have an Accountant degree.** As you can see, I really like maths and everything related with numbers.
I'm a software developer with solid professional experience building web applications. My main focus is on the front-end, but i love building and learning about both ends of the stacks.I consider myself a very capable person to achieve everything i propose to and always want to learn new things. I think i only need the oportunity to introduce myself and show what I'm worth.
